

CarbonWeb® 90

For The Roofing Industry

D-Mark's CarbonWeb 90 has proven to be effective in stopping odors generated during roofing work from entering buildings thru air intakes.

Patented CW 90 contains 90 grams per square foot of 60% activity granular carbon, and is designed to remove gaseous pollutants and odors from air.

CarbonWeb 90 is sold in rolls and can be cut easily with scissors, or a razor knife, and taped to cover intakes, whether they are on rooftops, near loading docks or at ground level.

D-Mark manufactures a complete line of Activated Carbon filter media and products for air purification.
